Product Description

DR Front Tine Rototiller

The DR Front Tine Tiller is perfect for preparing flower beds, weeding small areas, and mixing fertilizer into the soil. The tilling width is versatile because you can rearrange the tine clusters to get three different widths. The drag stake adjusts easily to optimize tilling in different soil types.

Product Summary

- Engine: 98cc, 3.33 ft-lbs Gross Torque, OHV
- Forward Rotating Tines
- Tilling Width: Variable (11", 16", 21")
- Wheels: 8" never flat

Warranty Coverage

- Machine: 2 years residential, 90 days commercial
- Engine: 2 years residential, 90 days commercial

Features

Variable Tilling Width Modular Tines, with inner and outer tine clusters, offer three different tilling widths—21" (with both outer tines attached), 16" (with one outer tine removed), or 11" (with both outer tines removed).

Forward Tine Rotation The tines propel the tiller forward while cultivating the soil. The rear drag stake provides resistance, allowing the tines to "slip" through the soil. Front tine tilling is ideal for breaking up clods in established gardens.

Never Flat Tires 8" x 1.75" easy-rolling tires make transport easy and are virtually indestructible.

Powerful Engine Easy-starting, OHV engine has 3.33 ft-lbs gross torque (98cc). 3600 RPM and Cast Aluminum Bore. Warranted for 2 years (90 days in commercial use).
